About Me

🔖 I am a fourth-year Ph.D. student in the i-VisionGroup at the Department of Automation, Tsinghua University, under the guidance of Professor Jiwen Lu. In 2021, I earned my BE degree from the Department of Automation and a second BA degree from the School of Economics and Management at Tsinghua University. Currently, my work is centered on explainable AI, deep learning theory, autonomous driving, and multi-modal models.

Interests

🔖   Beyond my routine scientific endeavors, I have a profound love for travel, using photography to seize and immortalize the beauty of life's fleeting moments. In the interstices of my work, I find solace in classical music, with a particular fondness for Chopin's compositions, which offer a serene balm to the soul and a catalyst for my research creativity. I also keep myself physically active with badminton, table tennis, and running, and I am always on the lookout for new and engaging activities to enrich my life. Life is a continuous journey of discovery and exploration.
